

Drezen

Drezen Automatic Pet Wash Cabin

We don't just build machines

We create "love-centered pet care ecosystems"

Drëzen

Product Functionality

- Dual Operating Modes
- Intelligent Constant Temperature System
- Ultra-Fine Mist Water Output
- Multiple Shampoo Dispensing Systems
- Ozone Therapy System
- Fresh Air Circulation System

Large Transparent Window Design

Expanded transparent glass with a wider field of view allows dogs to observe the outside environment at any time, effectively relieving claustrophobic anxiety and greatly reducing stress responses.

Spacious Unrestrained Interior

Dogs can stand, turn, and lie down freely inside the cabin without spatial restrictions, ensuring a more relaxed and cooperative grooming experience.

Soft Interior Lighting

Gentle cabin lighting allows owners to clearly observe the pet's condition throughout the entire grooming process.

Drëzen

**Pets are more than just animals.
They are family, loyal companions, and our most selfless loved ones.**

Dual Operating Modes

Fully Automatic Mode

One-key start to automatically complete bathing, shampooing, rinsing, disinfection, and drying — no manual intervention needed.

Manual Mode

Allows owners to participate fully, freely controlling water flow, shampoo dispensing, and air drying for precise grooming.

Large Smart Touch Screen

Visual operation interface for intuitive mode switching and parameter adjustment.

Intelligent Constant Temperature System

24h Constant Water Temperature

Integrated thermostatic water heater with high-precision sensors for real-time temperature control, stable and comfortable in all seasons.

Smart Temperature Control

Automatically adapts to ambient temperature changes to prevent skin irritation from too hot or cold water.

Constant Temperature Warm Air Drying

24h constant-temperature warm air with even distribution for fast, skin-friendly drying.

Ultra-Fine Mist Water Output

Ultra-Fine Mist Output

The water comes out as ultra-fine mist droplets, light and widely dispersed, so it will not enter the eyes, ear canals, or nasal cavity.

Safe Non-Penetrating Design

The tiny droplets are too small to penetrate eye membranes or ear canals, making bathing safer, irritation-free, and low-stress.

Full Coverage Spraying

360° surround spraying wets the whole body evenly with no dead corners, ensuring thorough rinsing.

Multiple Shampoo Dispensing Systems

Multiple Independent Shampoo Dispensing

The machine is equipped with multiple independent shampoo and conditioner dispensers, and the quantity can be customized to meet diverse grooming needs.

Multi-Function Grooming Compatibility

It can be equipped with grooming products of different functions: hypoallergenic, skin care, hair care, deep cleaning, deodorizing, insect repellent, etc., suitable for all dog breeds, skin types, and coat conditions.

Precise Automatic Dispensing

Auto-quantitative liquid output with accurate ratio to avoid waste and excessive irritation.

Ozone Therapy System

Drezen automatic pet wash cabin is equipped with a professional ozone processor, converting tap water into ozonated water throughout the bath to provide safe, gentle spa-level care for dogs.

Antimicrobial Action

Eliminates bacteria, fungi, mites, and viruses; improves dermatitis, itching, and ringworm

Anti-Inflammatory & Soothing

Reduces redness, allergies, and discomfort from insect bites; relieves scratching and restlessness

Wound Healing Acceleration

Improves skin oxygenation and speeds up the healing of damaged skin

Deep Cleansing & Detoxification

Breaks down oil, dirt, and allergens for fresh, fluffy fur

Odor Neutralization

Decomposes odors at the source for long-lasting freshness

Ozone Residue-Free

Quickly breaks down into oxygen after bathing; non-toxic, lick-safe, and harmless

Fresh Air Circulation System

Continuous Ventilation, No Stuffiness

Continuous fresh air intake with active exhaust keeps the cabin well-ventilated throughout the grooming process — dogs breathe comfortably without any stuffiness.

360° Airflow Circulation

Multi-directional airflow outlets ensure even air distribution throughout the cabin, eliminating dead spots and keeping every part of your dog's body comfortable.

Air Purification & Filtration

Incoming fresh air is purified and filtered, effectively removing common allergens and particles for a cleaner breathing environment.

Optimized Cabin Airflow Design

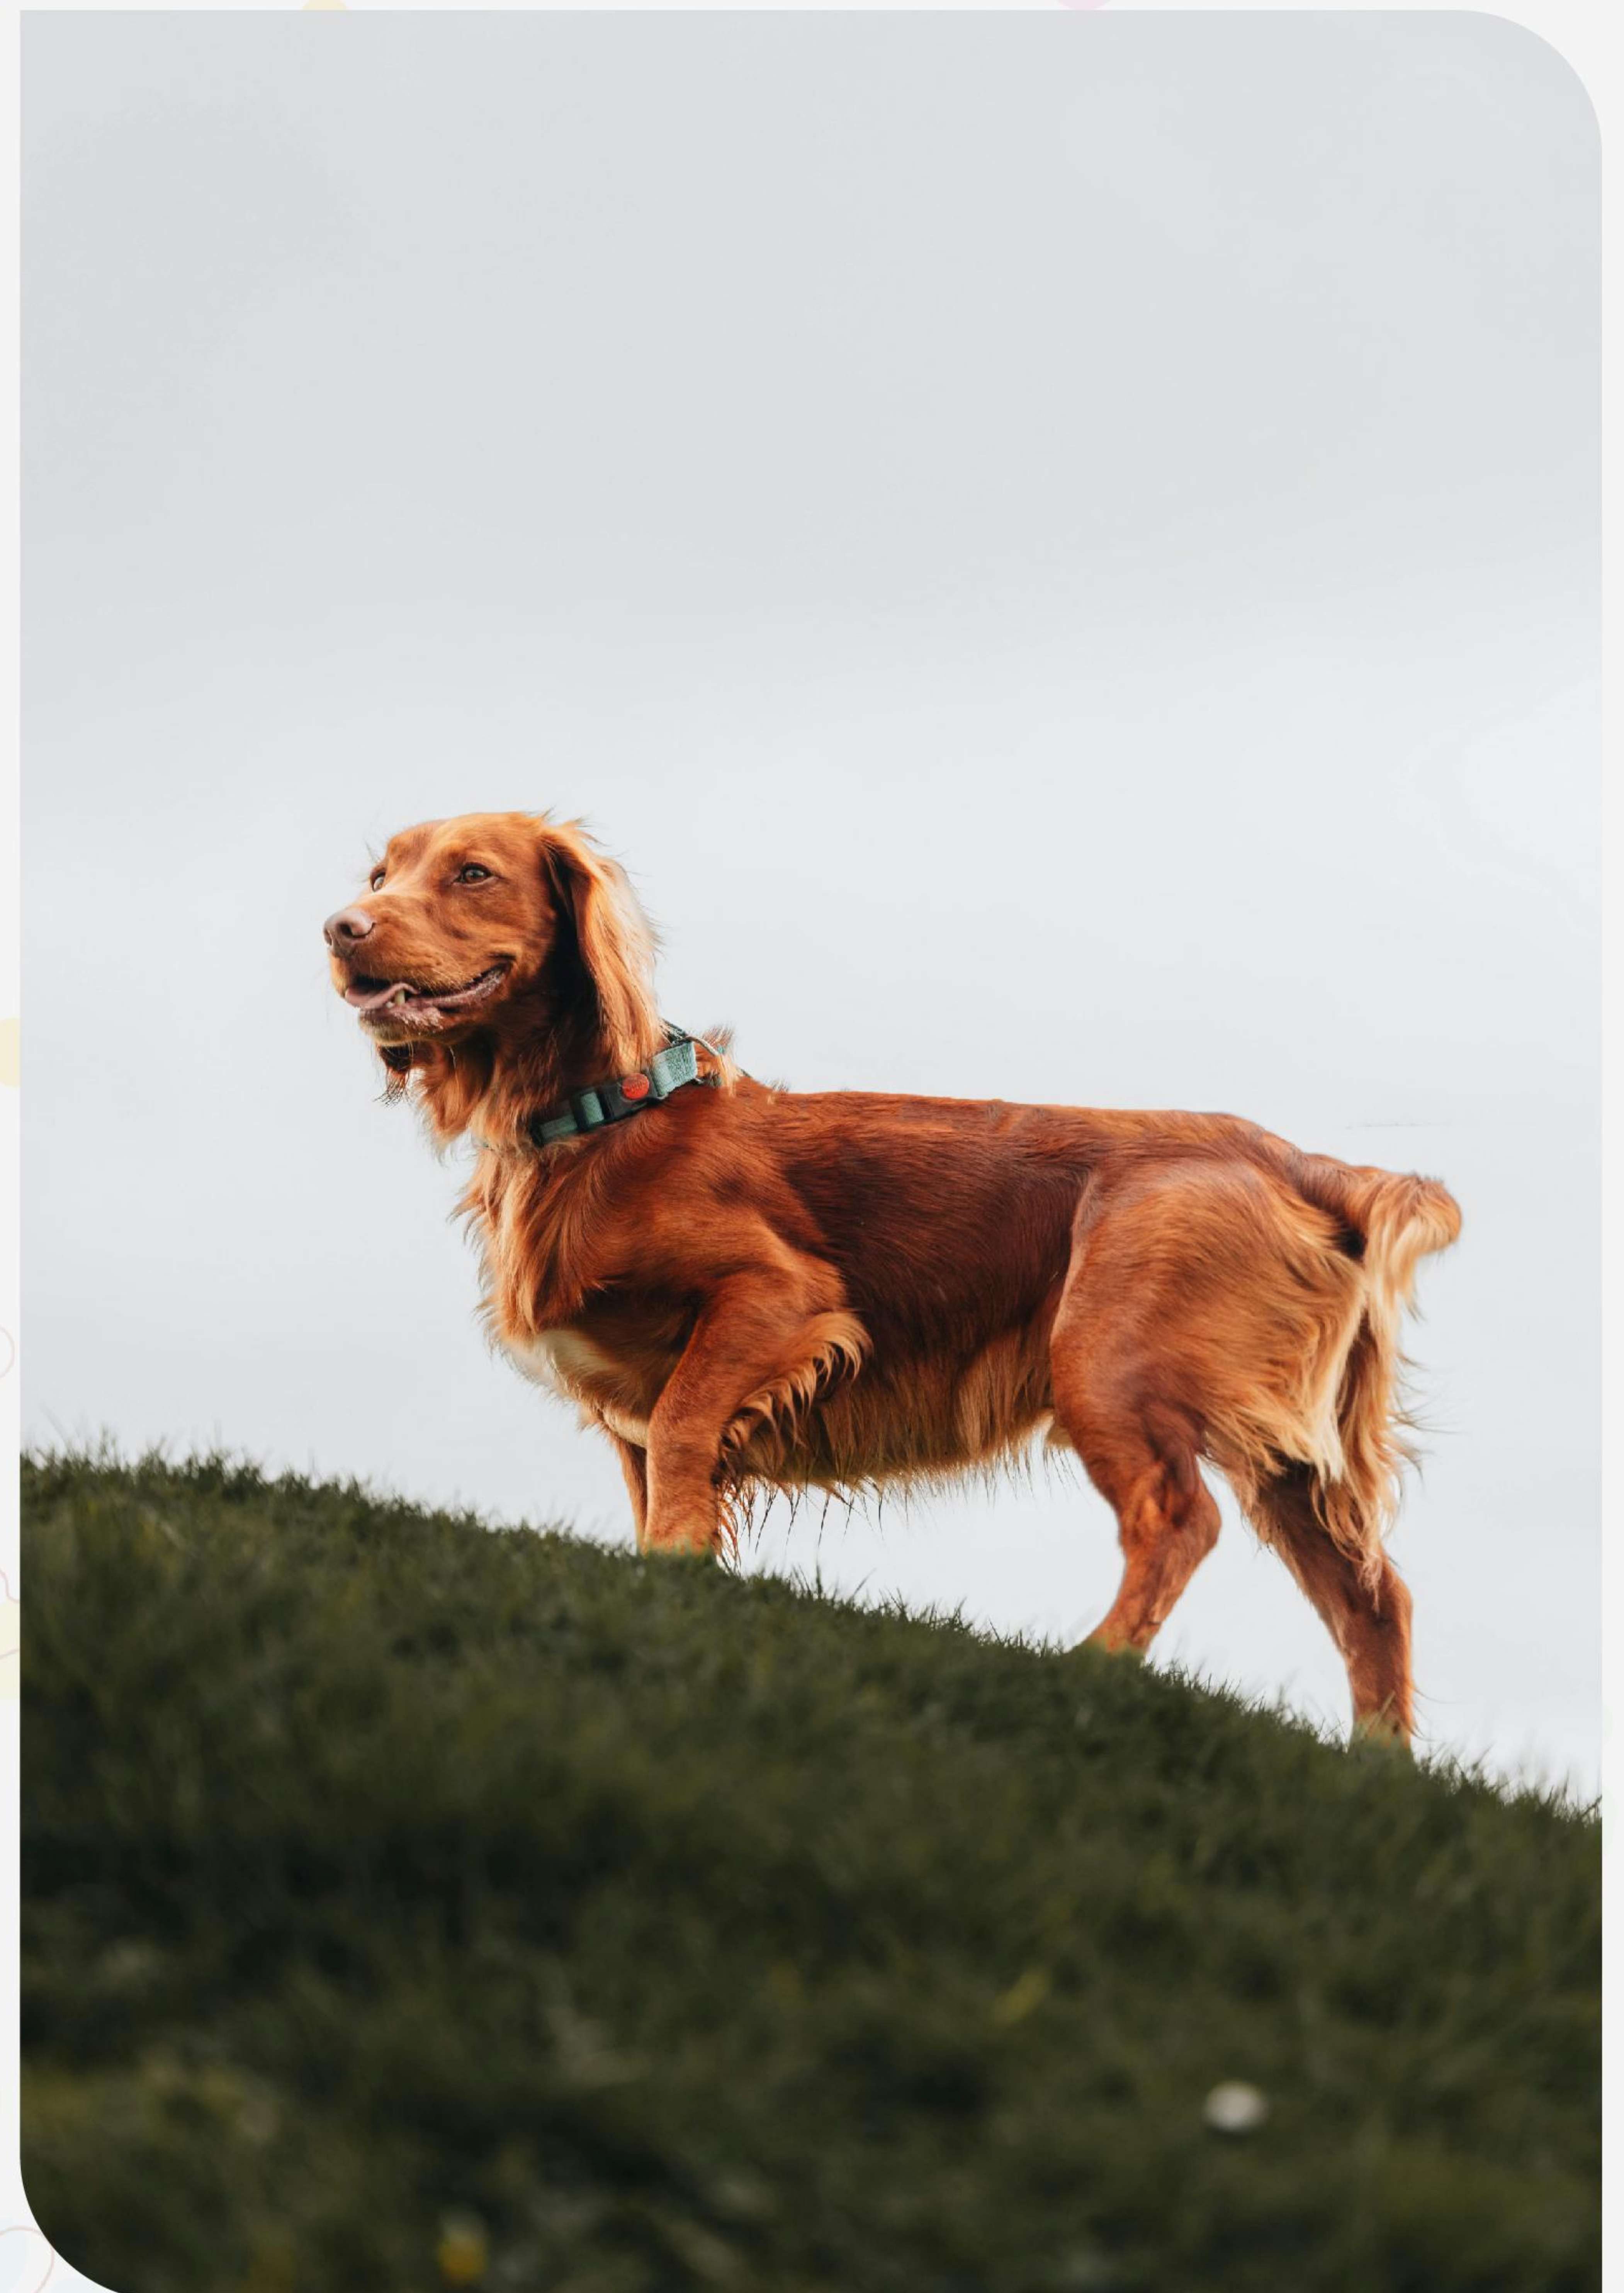

Optimized airflow design ensures continuous ventilation during operation, maintaining a fresh breathing environment while blocking external dust.

Quiet & Low-Noise Ventilation

Quiet ventilation design with low noise operation ensures a calm, stress-free grooming experience.

Safety Protection System

Emergency Stop Button: One-key pause in emergencies to protect pets and users.

IP65 High-grade Waterproof & Dustproof: Core parts are waterproof and moisture-proof to extend machine life.

Leakage Protection: Circuit system with leakage detection, auto power-off to prevent electric shock.

Secure Grounding for High Power: Reliable grounding for high-power circuits to prevent surges and faults.

Full-body waterproof design: Avoids circuit short circuits for safer use.

Drezen is not only built for performance, but also engineered for trust.

Commercial Value **Efficient • Reliable • Scalable**

The Drezen automatic pet wash cabin is designed as a complete business solution, combining operational efficiency, long-term reliability, and scalable deployment. From daily operations to multi-location expansion, every detail is engineered to support sustainable growth.

Low Consumption

- Only 20–30 liters of water per wash
- Energy-saving, eco-friendly, and cost-effective

Easy Maintenance

- Regular solution refills
- Cabin check & cleaning every 2–4 weeks
- Service life up to 8–10 years

Simple Installation

- Only water inlet, drainage, and power connection needed
- Works indoors and outdoors
- Adaptable to hot and humid climates

Smart Management

- Remote backend for data, pricing, and time settings
- 24h unattended operation supported
- Membership system & marketing tools available

Drezen is more than equipment — it is an investment in efficiency, sustainability, and scalable growth.

Multiple Payment & Membership System

Supports online payment, bank cards, credit cards, Apple Pay, cash, and more.
Supports membership subscription, stored value, session cards, etc.
